

AEROFIX2

Spray adhesive

Ideally suited to bonding light and medium weight materials

Features

- High performance styrene based spray adhesive, specially developed for bonding light and medium weight materials, particularly fibre reinforcements such as glass and carbon fibre.
- Aerofix adhesive is clear, which avoids unwanted visible traces.
- Ease of use allows rapid coverage of large areas.
- Aerofix quickly bonds together a wide range of materials, including plastics, fabrics, breathers, foams and light woods, e.g. balsa.

Instructions for use

- Shake the aerosol well before use and ensure that the surfaces to be bonded are clean and dry.
- Hold the aerosol vertically and spray an even layer of adhesive from a distance of 25cm (10in). It must not have the appearance of being wet. If this is the case, spray from a little further away.
- To achieve optimum adhesion, spray the adhesive onto both surfaces to be joined and wait around one minute so that the solvent present in the adhesive may evaporate.
- Finally, press the two surfaces firmly together to ensure good adhesion takes place.
- After each use, purge the aerosol whilst holding upside down.

Availability

Contents: 500ml/1pint

Storage

- Aerofix is supplied in a pressurised container. Protect from direct sunlight and do not expose to temperatures of more than 50°C (122°F).
- Store and use well away from flames and all sources of ignition.

Health & safety

Do not use near heat sources or functioning electronic appliances.

No skin irritation problems experienced.

Handling of these products must conform to individual company guidelines and health and safety regulations.
