

# Impression set 'V'

## Pre-fit verification film

Ideal for taking and setting the imprint of metallic and non-metallic details

### Features

- Impression Set 'V' is a multi-purpose, 0.012in (0.3mm) thick, fluorescent, vinyl-based film specifically formulated to take and set the imprint of metallic and non-metallic details during the pre-fit of sub-assemblies, including face sheets to structural foam core and honeycomb core.
- Intended to be used where other pre-fit inspections cannot be accomplished or easily verified.
- Can be applied to sub-assemblies to stimulate a bond line or mating joint, and will take on the same configuration as the simulated bond line or mating surfaces.
- The Impression Set 'V' can then be inspected to determine if additional steps need to be taken to ensure proper bond lines or fitting.
- Impression Set 'V' can be processed at temperatures from 65 to 93°C (150 to 200°F), and minimal pressure will provide adequate imprints for analysis.

### Properties

Maximum use temperature	93°C	200°F
Softening point	65°C	150°F
Colour	Fluorescent red	
Film	Vinyl based	
Tensile strength	24.8MPa	3600psi
Elongation (at break)	250%	

### Availability

Thicknesses	0.3mm	0.012in
Standard width	1.42m	1.55yd
Standard length	45.7m	50yd
Other colours and thicknesses may be available		

### Storage

Store in original packaging

### Health & safety

Handling of these products must conform to individual company guidelines and health and safety regulations.
